

Team Portal

The easy way to organize your work and stay in control.

NetConnect Team Portal is a completely new way to host SharePoint sites and applications. The web based collaboration tool simplifies teamwork and project management. Choose from professional templates to easily manage workspaces, multiple projects, resources and participants. You have full control over progress, due-dates and calendars.

NetConnect Team Portal features:

- A repository of workspaces and project templates
- Document- and file sharing with versioning and work flow
- News, discussion forums and wikis for sharing ideas
- Integrated conferencing tools
- Sharing workspaces from anywhere in the world
- A natural add-on for any Microsoft Office user

Team Portal makes it easy to set up and manage SharePoint sites and applications. Team Portal has minimized the steps and requires little to no training.

Team Portal lets you and your team work more efficiently and effectively, saving time and resources while reducing travelling.

A new way to host SharePoint

NetConnect Team Portal is a completely new way to host SharePoint sites and applications, by simplifying management and provisioning of SharePoint.

Our hosted SharePoint infrastructure has a ready-to-deploy repository of workspaces and site templates that let you choose from simple document sharing sites to more comprehensive project templates. Team Portal lets you collaborate and communi-

cate securely with team members both inside and outside the organization. The intuitive dashboard interface makes it easy to set up and manage SharePoint – while efficiently creating, editing and managing sites, members and resources.

Key features

Team Portal key features include:

- Built around SharePoint, the NetConnect Team Portal provides a repository of site and application templates that can be tailored to each customer
- Get up and running in no time with no setup fee – SharePoint sites are provisioned automatically when a template is selected
- The dashboard makes it easy to manage sites and members, as well as invite members, both internal and external, to a workspace
- The solution is fully integrated with Microsoft Office Live Meeting and web conferencing
- The web based solution also reduces the need for travelling and helps reduce harmful emissions to the environment

The Team Portal effect

Collaborating in Team Portal enables users to:

- Accelerate team productivity with easy-to-use collaborative and communication tools
- Keep on track with easy-to-use project management tools
- Easily manage documents and help ensure integrity of content
- Reduce the complexity of securing business information
- Collaborate and communicate with groups of two or even thousands from anywhere in the world
- Capture and re-use best practices

Applications market place

Through the Team Portal market place, the rapidly growing community of SharePoint developers and professionals can submit and distribute SharePoint applications. The market place is a hosted environment that standardizes

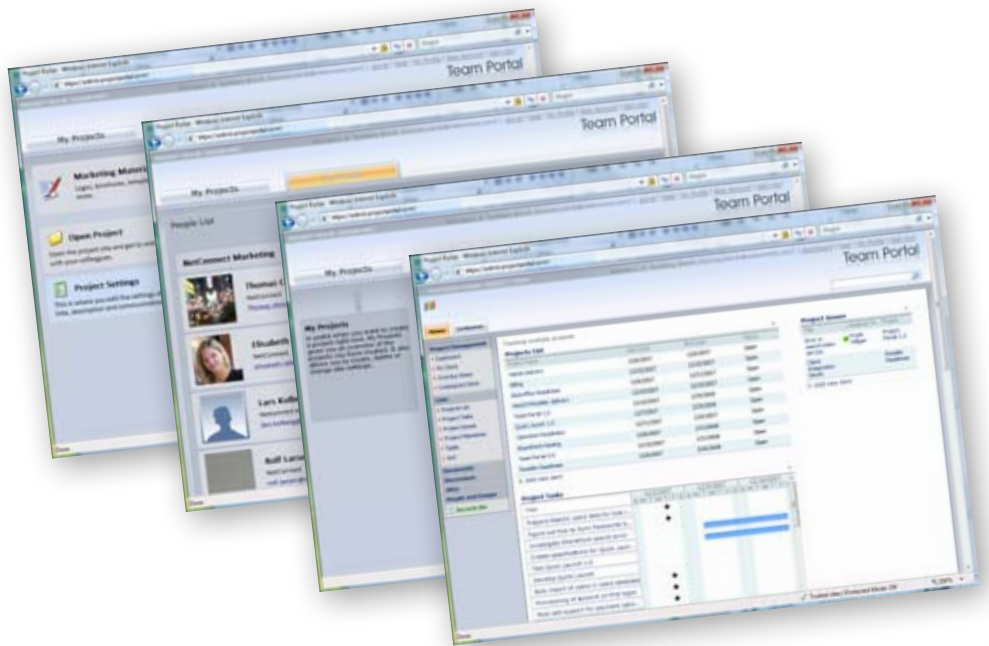

administration and user experience. This opens up the possibilities for developers, distributors and users.

SharePoint applications not only supplement the existing functions and templates available

in Team Portal, but will extend the functionality greatly. Project management tools from BrightWork and real-time conferencing from Premiere Global Services are just two examples.

Partnering

Strategic partnerships give us the opportunity to integrate additional content and functionality within our solutions. NetConnect collaborates with both content partners and channel partners, and we are always interested in talking with innovative, dedicated and highly specialized companies.
